

CODA MIX

Liquid blend of trace elements

FORMULATION: Liquid formulation.

DESCRIPTION: A balanced Liquid blend of trace elements for deficiencies corrections suitable for use throughout the crop cycle

MODE OF ACTION:- **CODA-MIX** is a trace element complex for FOLIAR application of trace elements. **CODA-MIX** contains a balanced mix of trace elements with the natural complexing agent (lignosulphonates), providing great absorption and assimilation in FOLIAR application. **CODA-MIX** is a good dispersing and wetting agent when applied with other products. **Coda mix** is applied as a foliar spray or by fertigation.

	GUARANTEED ANALYSIS		REMARKS	
		%W/W		%W/V
	Boron [B]	0.30	0.38	- Contains balanced blend of trace elements with natural complexing agent [lignosulphonates], providing greater assimilation and absorption in foliar application - It is a good dispersing and wetting agent when applied with other products - Water soluble
	Copper [Cu] complexed	0.12	0.15	
	Iron [Fe] complexed	4.00	5.12	
	Manganese [Mn] complexed	2.00	2.56	
	Molybdenum [Mo] complexed	0.08	0.10	
	Zinc [Zn] complexed	0.50	0.64	
COMPLEXING AGENT: EDTA, citric acid and Lignosulphonate				

CROPS RECOMENDATIONS AND TIMING

Coda mix is applied as a foliar spray or by fertigation.

CROP	NO of applications	Average doses /Application L/HA CODA MIX
Coffee	1-3/ Cycle	2-3 L/Ha
Maize	1-2/Cycle	1-3 L/Ha
Wheat /Rice	1-2/Cycle	1-3 L/Ha
Legume/dry Beans/French Beans Runner/ Beans	1-3/Cycle	2-3 L/Ha
Tomatoes	2-3/Cycle	2-3 L/Ha
Paper	2-3/Cycle	2-3 L/Ha

CROP	NO of applications	Application L/HA CODA MIX
Roses/ Ornamentals	2-3 /Cycle	2-3 L/Ha
Strawberry	2-3 /Cycle	2-3 L/Ha
Fruit Trees	2-3 /Cycle	2-3 L/Ha

AVERAGE FOLIAR DOSE : 2-3 LTS /HA

FERTIGATION : From 1 to 2 liters /HA every 7-10 days

IMPORTANT OBSERVATIONS TO NOTE: - The product is not subjected to any toxic considerations. It can be applied from the first development stages to the harvesting time.
 - Its application is recommended under technical agronomic advice
 - Optimal storage temperature between 5-20⁰C

COMPATIBILITY: CODA-MIX is compatible with most of the phytosanitary products. However, it is recommended that you perform a compatibility test before mixing with other products.

AGRONOMIC BENEFITS: - Can be applied with other products as a wetting agent
 - Suitable for organic agriculture
 - Chelated thus high assimilability

AVAILABLE PACKS: 1 Litre
